

V8 Super Sportster Kiddie Ride

The V8 Superchargers kiddie ride is a great way to entertain kids and increase time spent at your site. As well as this, it presents an effective way to generate extra income. This sports car kiddie ride seats two children and features two moveable steering wheels so they can both pretend to drive at the same time. It makes growling engine noises like a real V8 and rocks to mimic a car's movement.

Available in bright red and with flashing lights underneath the car to attract attention, it's impossible for kids to miss.
