

GoGo Pony Kiddie Ride

This exciting ride mixes the best of a traditional kiddie ride and a video game in an irresistible package. Go Go Pony is an excellent addition to any site, bringing in additional revenue, keeping kids entertained and their parents on your premises for longer.

Featuring a 19-inch LED monitor with colourful graphics, kids control their in-game pony across a range of levels. The ride itself is brightly-coloured and lights up so kids won't be able to miss it. They get to hop on the back of the pony and control their movements in the game with the pony's reins.

Multiple machines can be linked up for multiplayer fun, so kids can race each other for extra fun.

The player's in-game pony will turn into Super Pony on the second play, giving them new abilities and encouraging children and parents to put more coins in.
